WORK EXPERIENCE

Frontend Developer
Indispare

Achievements/Tasks

- A marketplace for buying and selling spare parts used in the manufacturing industry. My job was to develop customer module with the following features: Dashboard, Profile management, quote management, purchase order, and inventory management. I used **ReactJs**, **NextJs** and **Ant design**.

Summer Intern
Race2Cloud

Achievements/Tasks

- My main job was to create a vendor selection app using zoho's low code platform called zoho creator .The app caters to vendors, managers and selection executives and significantly eases the process of vendor selection

CERTIFICATES

Neural Networks and Deep Learning ⬈

PROJECTS

Indispare Website (07/2022 - Present)
- Indispare is a marketplace(web app) for buying and selling spare parts used in the manufacturing industry. My job is to develop customer module with the following features:
- Customer Dashboard, quote management, customer orders page, inventory management, and dashboard analytics.
- Tech stack used: **React Js**, **Next Js**, and **Ant Design**.

ACHIEVEMENTS

Solved 200+ problems across various coding platforms such as geeksforgeeks
